

Skyline WindScape® Accessories

WindScape Stabilizing Feet- Panels Weight 5.65 lbs. per foot

WindScape LED Arm Light with Protective Packaging

WindScape Tablet Mount for iPads
Packages are available in gloss black and gloss silver for domestic and Metric use. A ball joint feature in the package allows you to rotate from Horizontal to vertical display as well as swivel and tilt the mount angle.

WindScape Overlays - There are 6 different overlay shape options. These 3" single-sided overlay frames add interest and depth to a display. Overlays also allow for the changing of messages from show to show without changing the main frame graphic.

WindScape Accent Panels - There are 4 different panels. Accent panels are used to add design interest and depth to a display. They can also be used as an overlapping panel, when putting 2- 10' displays together to create a 20' Inline.

WindScape Connections - WindScape integrates with all Skyline's structural products
